ADSERIES ADJUSTABLE SHELVING

ADJUSTABLE SHELVES

Tools, equipment and cargo come in all shapes and sizes and until now, there hasn't been a shelving unit that is truly adjustable. The ADseries is the first of it's kind where, with only a screwdriver, you can simply remove the front shelf bolts and move the shelf where you need it. Shelves can be adjusted in one inch increments and provide the most flexible shelving solution available.

Truly Adjustable Shelves All you need is a phillips screwdriver! Simply remove two bolts from the speed nut clips that come with the shelf, tilt the shelf upwards, move the shelf to your desired location, insert the rear shelf studs, reattach the bolts and you're done!

Rear Shelf Studs unique design lock shelves in place!

ADAPTABLE INTERIOR

Everyone likes to set their work van up their own way. The new ADseries shelving lets you position the shelving where you need it. Exclusive to the ADseries, the unique rail system enables you to reposition the shelving in the van, increasing the available space for trade specific equipment. All of this is done without removing bolts, plugging holes and redrilling the van!

ADD ACCESSORIES

Businesses change over time and your van interior should be able to change with your needs. Plug and Play shelves have prepunched holes that allow adding storage solutions easily! ADseries dividers simply snap in place, drawer units simply bolt in and door kits can be added to lock your more valuable parts and equipment. Many Adrian Steel accessories can be added to the ADseries shelving with the rail adapter kits and end panel brackets.
