Adrian Steel's completely redesigned grip-lock style ladder rack is designed to make your job easier when loading and unloading your ladders. The innovative "tilt angle" design offers a lower reach height than traditional grip lock style racks. Technicians that are 5'7" or taller can safely load and unload ladders with out having to climb up on something.

The clamping mechanism secures and protects ladders when they are stowed or in transit. A padlock can be added for extra security. The natural aluminum finish reduces corrosion and helps preserve the integrity of the rack.

The all-new Grip-Lock Ladder Rack is an economical option that will look great and perform effortlessly for many years on your van!

Technicians that are 5'-7" or taller can easily load and unload the rack without climbing up on anything.
