Wiring Harness for Cargo Lighting 2017-2022 Ford Transit Connect

INSTALLATION MANUAL

Thank you for purchasing the **CL-FTC**

Table of Contents

Page 3 - Tools Required For Installing Additional Accessories
Page 8 - Wiring Diagram

WHAT'S INCLUDED:

- Vehicle Specific Wire Harness (CL-FTC)

COMPATIBLE ACCESSORIES:

- LED Dome Lamp (STL40489-2)
- 2570mm Roof Bow Harness (P-HARRB3)
- 3470mm Roof Bow Harness (P-HARRB4)

TOOLS REQUIRED:

1. Diagonal Cutters
2. Phillips #2 Drill Bit
3. Drill

STEP 1:

Locate the OEM Cargo Lamp connection that is above the headliner on the passenger side of the vehicle. Note: Easiest to access from back edge of headliner.

Note: 2022+ Transit Connect vans are equipped with a foam block above the headliner that will need to be removed before gaining access to the OEM connector. Enter the vehicle through the passenger side slider door and remove the block by pulling down the rear passenger corner of the headliner, then pull the block straight back towards the rear of the vehicle. The foam block needs to be re-installed after installation of lights is complete.

STEP 2:

Unplug the OEM Cargo Lamp connectors and install the CL-FTC harness between the two connectors.

STEP 3:

Install the STL40489 (or alternate CL-xxBLED) lights onto the center of the vehicle's roof bow;
leave the light connector exposed

- Peel the red adhesive liners off and stick the light in place
- Use the provided 3/4" screws to secure the STL40489 light to the roof rib

STEP 4:

Connect the appropriate P-HARRBx roof bow harness to each light.

- Refer to the diagram on page 8 to confirm proper P-HARRBx for each roof bow

STEP 5:

Use the fir tree cable ties that are packaged with each P-HARRBx to secure the harness to the vehicle's roof bow. Trim off excess cable tie material with diagonal cutters after harness is secure. (Photo below is for reference only)

STEP 6:

Route all P-HARRBx roof bow harnesses inside the channel that runs along the passenger/curbside roof line

- Trim off excess cable tie material with diagonal cutters

STEP 7:

Plug all installed P-HARRBx harnesses into the mating connectors on the CL-FTC harness.

STEP 8:

Confirm all installed lights are operational

Vehicle	Roof Bow 1	Roof Bow 2
Transit Connect	P-HARRB3	P-HARRB4
