ITEM DESCRIPTION: WIRE TIE, NYLON 40Lb, 8.5" BLACK

MANUFACTURER: WAYTEK, INC. or equivalent

MANUFACTURERS PART NUMBER: 21093M or 21093C

SPECIFICATIONS: STANDARD CABLE TIE

BLACK, NYLON 8-1/2" LONG

TENSILE STRENGTH: 40.0 LBS

21093M = 1,000 quanity 21093C = 100 quanity

SPECIAL NOTES: PART NUMBER IS BLACK.

Please check information to confirm accurate vehicle specifications.

CLEANING INSTRUCTIONS All surfaces must be considered contaminated. Clean the vehicle surface immediately before applying the film. Dust and other contaminates can collect quickly on the surface and prevent the film from adhering properly. Even a freshly painted surface can collect dust before graphics can be applied.

For the best success with the films recommended for vehicle graphics, always apply the graphics when the air and vehicle surface are both above 60°F (16°C) and below 90°F (32°C) before beginning the installation.

SEGMENT EST

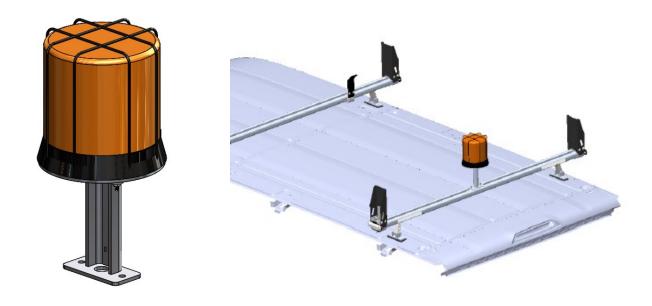

Introduction / Comments:

Dealer Instructions for 70970

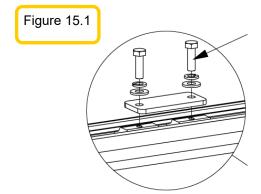

Note:

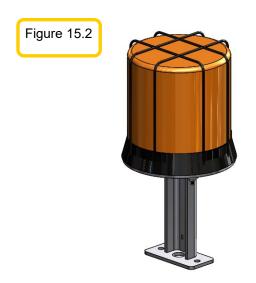

Read all instructions prior to installation. Review the Adrian Steel **GENERAL PRECAUTIONS PAGES** (56638) before attempting installation. Only personnel familiar with using electrical best practices should perform this install. Reference **ELECTRICAL BEST PRACTICES MAN-UAL** (54479) before attempting installation.

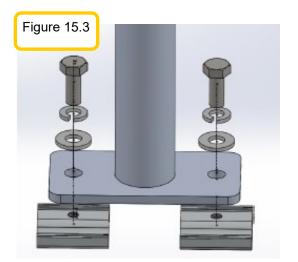

Dealer Instructions For 70970

Step 1:

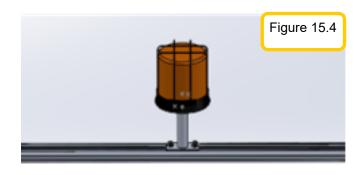

Locate the ladder rack rear cross bow center. There will be a metal plate fastened down with bolts, onto 2 spacers. Remove the top metal plate by removing the two bolts. Be careful not to lose the bolts or the slides in the rail, under the ware strip. Figure 15.1.

Now grab the beacon/mount assembly. Figure 15.2.

Assemble the beacon mount feet by inserting the bolt (FAS0799) through the lock washer (FAS0588) then flat washer (FAS0552) then through the foot into the slide. Do not tighten down at this point. Figure 15.3.

Step 2: Connect the beacon harness connector to the beacon. You will need to remove the cap on the beacon harness.

Tighten the bolts once you have positioned the beacon (as centered on the rail as possible). Figure 15.4.

Double check the functionality of the lights and switches.
