PRODUCT FEATURES

Composite partition for Mercedes Metris provides a semi-sealed solution for separating the cab area from the cargo area. The composite partition features a full perimeter bulb seal that seals off the majority of the airflow from the cab area to the cargo area. This feature provides better climate control for the cab area and reduces noise transfer from the cargo area to the cab area.

**** This will NOT work with dual side sliding door option ****

If your vehicle contains carpet or a rubber floor mat you will need to prepare the mounting location. Position the product to be installed into the vehicle and once you are satisfied with the mounting locations, mark the mounting locations. Using a 1-3/16" diameter carpet cutter (P/N: 31183-0). Select the appropriate floor spacers as shown in the illustration. Set those aside for use later into the installation process. Using the correct drill bit size for the selected plusnut, drill the mounting holes in the vehicle sheet metal to prepare for installing the plusnuts. If you are thru-bolting at any of the locations simply drill a hole that is 1/16" larger than the bolt size(s) for those locations. Once you have drilled the holes into the vehicle, the raw metal edges should be sealed using a self-etching primer to resist corrosion and potential fastener point failure.

A PLUSNUT (RIVNUT) SETTING TOOL IS REQUIRED FOR PLUSNUT (RIVNUT) INSTALLATION . PLUS NUT SETTING TOOL CAN BE ORDERED THROUGH ADRIAN STEEL, OR USE AN AIR POWERED PLUSNUT SETTING GUN.

1/4-20UNC Plusnut (FAS0052) Use 3/8" dia. drill w/stop

FAS0080 SCREW, HXHD, 1/4-20UNCx2.00", G8
FAS0067 WASHER, FLAT, 1/4"ID
22200-0 PLUSNUT TOOL

5/16-18UNC Plusnut (FAS0091) Use 1/2" dia. drill w/stop

FAS0095 SCREW, HXHD, 5/16-18UNCx2.00", G8
FAS0086 WASHER, FLAT, 5/16"ID
22200-0 PLUSNUT TOOL

Place barrel of the plusnut body in sheet metal thru hole until flange is flush with sheet metal.

Using a 9/16" combination wrench of plusnut tool body and a second hand wrench, ratchet, or air tool, rotate the hex bolt head CW to draw plus nut flanges up (set the plusnut).

Step 01

Attach top bracket and CurbSide top bracket as shown. Plastic spacers will be needed for each side. Attach directly to OEM mounting holes. Suggestion: Attach CurbSide first then StreetSide.

Step 02

If your vehicle contains carpet or a rubber floor mat. Place footer rail in approximate place shown and mark two hole locations. Use a 1-3/16" hole saw (part # 31183-0) at the marked locations. Cut through the floor mat, but NOT the floor. (Or use previously validated drill jig) You should now see the OEM mounting holes.

Step 03

Place one (1) tall spacer over OEM Street Side mounting hole then stack one (1) mid sized and one small sized spacer Over OEM Curb Side mounting hole. Fasten the footer rail to the vehicle as shown.

Step 04

Find and drill out OEM holes on the StreetSide as shown for plusnuts. Use a 3/8" drill bit with stop then apply primer to the drilled holes. Insert plusnuts and set. Attach bracket.

Step 05

Assemble three (3) brackets together and attach to the top roof bracket and the footer rail as shown.

Step 06

Attach cross support to clinch studs as shown. Then add pip insulation to vertical support. You will need to pull the laminate stripping away on the insulation. Line up the edges and push together to seal it.

Step 07

Cut Bulb seal in half. Place bulb seal to both sides of the partition as shown. Starting at the bottom corner and working up. Trim excess.

Step 08

Place partition into vehicle and fasten the 6 bottom slots into footer rail.

Step 09

Fasten the 5 top slots into header U bracket.

Step 10

Attach AD rail to partition as shown.

Step 11

Attach additional bulb seal on cover.

Step 12

Place cover on by inserting top flange into partition as shown and fasten.

YOUR INSTALLATION IS NOW COMPLETE.
