SLIDING PARTITION, LOCKING HANDLE KIT**

PARTS AND TOOLS NEEDED.

Locking Handle-  
(1) 30752-0  
With Keys

SPARLHK Spacer-  
(1) 63082

Fastener Bag-  
(1) BAG63060  
Has (2) FAS0461  
Screw, FHP M5 .8 X  
8mm ZP in it only

Tools Needed:

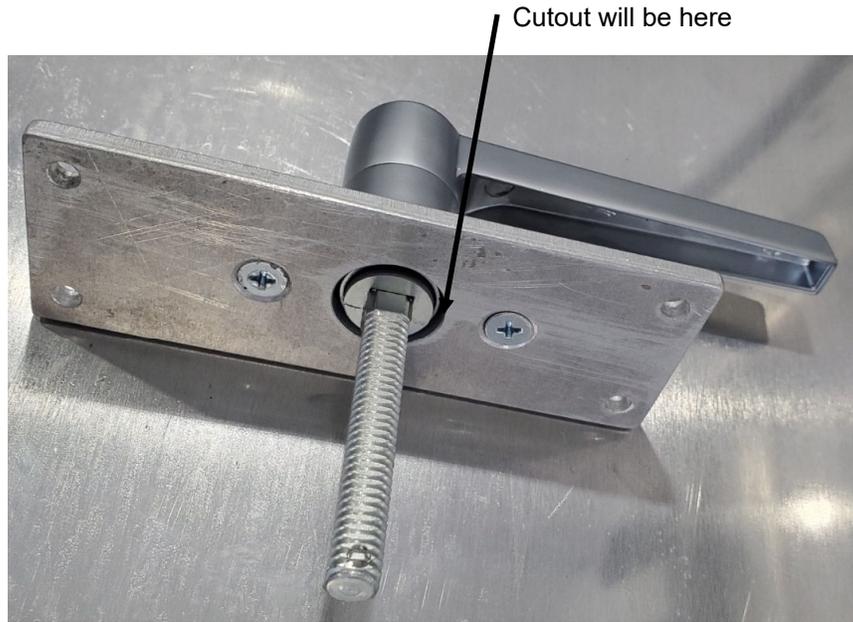

3/8 Wrench-

Phillips Head Driver-

1/8 Allen Key-

Step 1: Fasten the locking handle to the mounting spacer using the provided (2) screws. The rubber gasket will go on the side without the chamfered holes and the handle will point toward the cutout on the center hole of the mounting spacer.

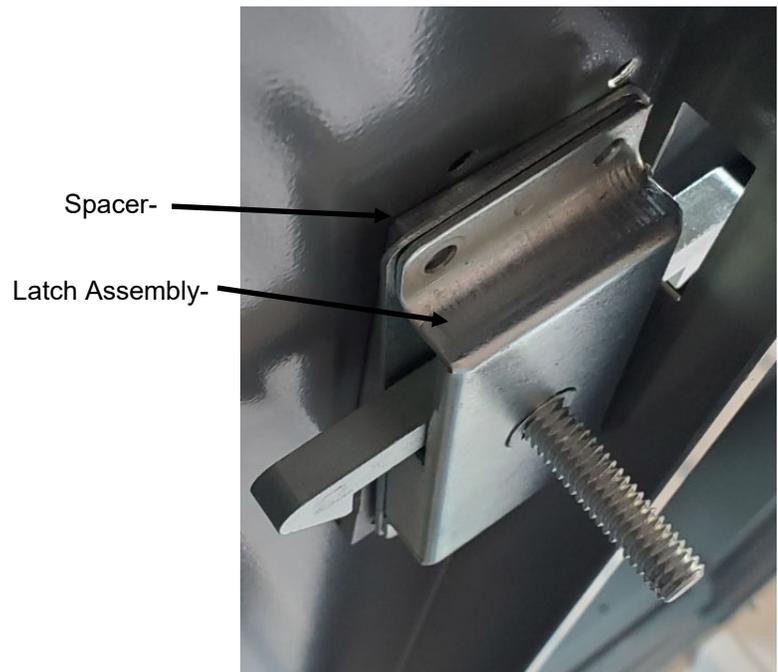

Flat head fasteners will set flat on the back side of the mounting spacer

Step 2: Insert the locking handle through the hole in the door panel with the handle on the cab side of the door. While doing this insert the spacer and latch assembly included the sliding door partition hardware kit. The spacer will be in between the latch assembly and the door.

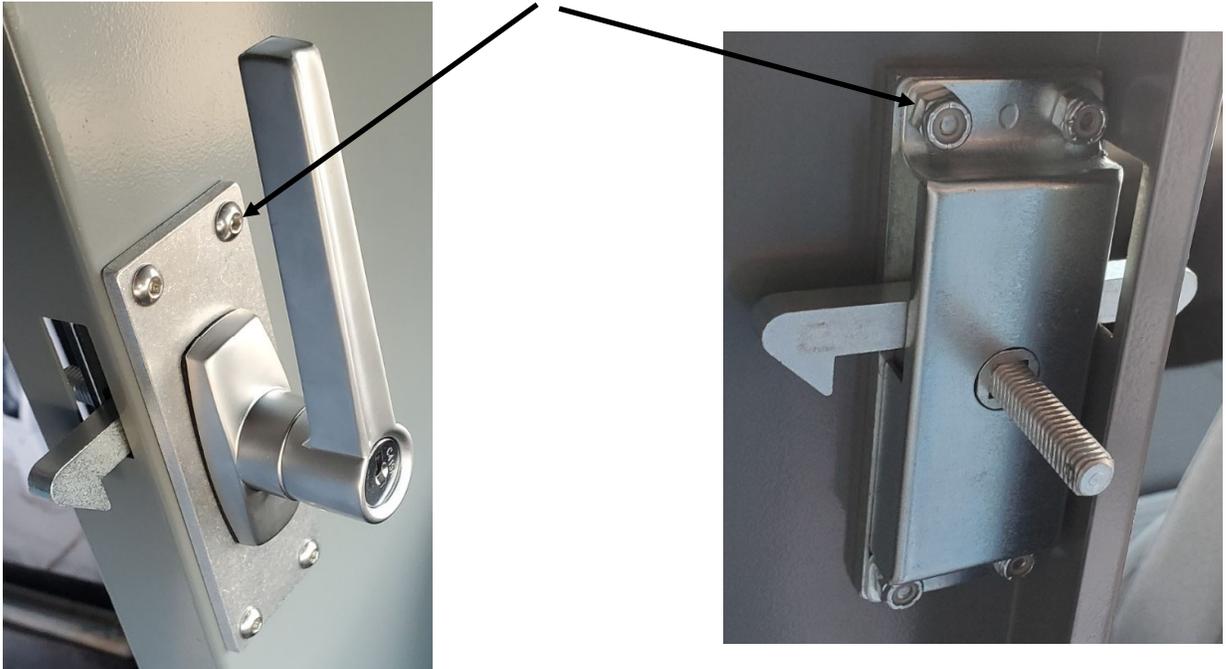

Cab Side

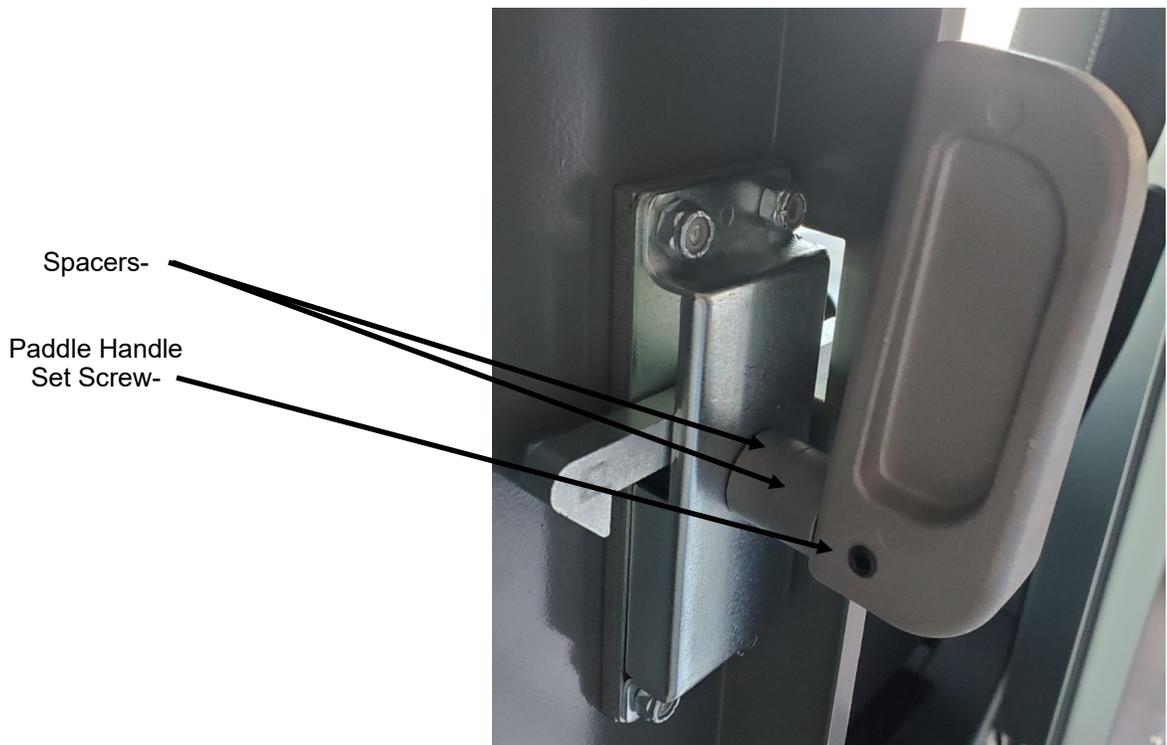

Cargo Side

Step 3: Fasten the handle and latch assembly together using the (4) sets of fasteners included in the sliding door partition fastener bag. Screw heads are on the cab side of the door.

Step 4: Add the (2) spacers from the sliding door partition hardware kit to the threaded shaft and secure the paddle handle in place with the set screw. Paddle handle is in the hardware kit for the partition.

**INSTALLATION IS COMPLETE! MAKE SURE THAT ALL FASTENERS HAVE BEEN THIGHTED!**
