

TR230150 - Tank Rack, 230150

PRODUCT FEATURES

TR230150 is designed to fit two thirty pound and one fifty pound freon tanks. It is also capable of carrying three thirty pound tanks (one in the 50lb shelf).

When mounting over an AD Rail kit an additional mounting kit is required. (RKAWTR)

TRSHELF50 is an accessory shelf that mounts to the top of this rack.

Tank racks can be stacked on top of one another for high roof vehicles as long as the shelf end panel next to it is 1/2 or more the height of the second rack when stacked. The tank rack must be properly secured to the shelf end panel, tank rack, and wall of vehicle for both racks.

Some drilling may be required.

If your vehicle contains carpet or a rubber floor mat you will need to prepare the mounting location. Position the product to be installed into the vehicle and once your are satisfied with the mounting locations, mark the mounting locations. Using a 1-3/16" diameter carpet cutter (P/N: 31183-0). Select the appropriate floor spacers as shown in the illustration. Set those aside for use later into the installation process. Using the correct drill bit size for the selected plusnut, drill the mounting holes in the vehicle sheet metal to prepare for installing the plusnuts.

If you are thru-bolting at any of the locations simply drill a hole that is 1/16" larger than the bolt size(s) for those locations.

Once you have drilled the holes into the vehicle, the raw metal edges should be sealed using a self-etching primer to resist corrosion and potential fastener point failure.
